Current Responsibility

Abby Camp is an analyst with the Life Practice in Milliman's Seattle office. She joined the company in 2008.

Professional Work Experience

Abby's recent work includes actuarial modeling for M&A, CFT, US Stat, GAAP, and IFRS 17 projects.

Abby has been a power user of MG-ALFA for the past 15 years. She has worked on model validations and helped clients transition from other actuarial software to MG-ALFA.

She has extensive experience upgrading databases to recent MG-ALFA standard databases. She also specializes in consolidating models and databases by removing obsolete code and inputs while preserving existing client results.

Abby has helped companies build out their production processes using Integrate Financial Projections and the full suite of Integrate products, allowing for end-to-end process reporting. Work like this entails gathering knowledge on the full process, making improvements and documenting the full financial reporting process.

Education

B.A. Mathematics, Cornell University
